

“With environmental lawmaking on the rise, and environmental conditions on the decline, this important volume comes just in time to help the world understand what we need to do to improve enforcement and compliance — the foundation for the rule of law, good governance, and ultimately for sustainable development. Clearly, we need to follow the lead of INECE.”

José Sarney Filho, Former Minister of the Environment, Brazil

“Enforcement and compliance are essential to the rule of law and sustainable development. Drawing on its global expertise, INECE brings together ... a collection of the best literature which will be enormously helpful to practitioners and scholars alike as they work to improve compliance with environmental law at all levels.”

Pieter van Geel, Secretary of the Environment, The Netherlands

“A vital and important book that will become required reading for all who share our concern about the Earth’s environment and who know that enforcement and compliance are the bedrock of the rule of law and sustainable development.”

Gus Speth, Dean, Yale School of Forestry & Environmental Studies

“This book provides important lessons for treaty negotiators, parliamentarians, regulators, prosecutors, judges, and NGOs. An indispensable tool for all who are concerned with using law to protect the Earth’s vital ecosystems and to promote sustainable development.”

Charles Di Leva, Chief Counsel, ESSD & Int’l Law, World Bank

“A must-read for anyone seriously interested in the future of environmental governance and a credit to INECE...”

Alan Miller, GEF Coordinator, International Finance Corporation

“This book may be the difference between making environmental law work and finding ourselves falling over the precipice... Read it and join the battle...”

Greg Wetstone, Director of Advocacy, Natural Resources Defense Council

“A valuable resource for judges, prosecutors, investigators, and all who care about the Earth and want to improve the profession of compliance and enforcement.”
